Imported and Domestic Tree and Shrub Seeds

P. O. BOX 1069 ALLENTOWN, PENNA.

TERMS and CONDITIONS

This list cancels all previous offers effective September 15, 1958. Prices quoted are fob Allentown, Penna., including packing (except export orders). Unless otherwise specified, prices for one half and one quarter pound lots are based upon the proportional pound rate; for example, seeds costing \$5.00 per pound would cost 50 cents per ounce, or \$1.25 for quarter pound, plus postage. Please remit full value of purchase (INCLUDING POSTAGE) with order. Shipments made on open account providing satisfactory credit arrangements have been made in advance.

On orders amounting to \$10.00 or over, a cash discount of 2% is allowed. Orders totaling less than \$5.00 are subject to a 25 cent handling charge. Invoices are due when rendered unless otherwise specified.

Orders are accepted subject to final crop outcome. In event of crop failures or short supplies, deliveries will be made in sequence orders are received. We reserve the right to return orders received in excess of our supplies. Some seeds are perishable and cannot be stored over the winter months. Such seed items must be ordered either before collection begins or while supplies are available.

Shipments travel at customers risk after our release to carriers. Any claims for damages incurred in transit must be made to carrier. All shipments sent parcel post will be insured.

Forestry Associates guarantees the origin, strain and year of seed to be as quoted herein. "Certificate of Origin" will be furnished upon request. All seeds are tested for germination and purity and such information is attached to each seed lot sold. Contents tags comply with the laws of the states of Penna., Michigan and New York.

Shipments should be examined carefully after arrival for appearance and shortages. No claims will be honored after customer has stored or planted seeds.

PRICES ARE SUBJECT TO CHANGE WITHOUT NOTICE

NOTICE TO ALL PENNSYLVANIA CUSTOMERS

Under Pennsylvania laws, all sales made within the Commonwealth are subject to a 3% sales tax. This law applies regardless if seed is purchased from a dealer within this state or from sources outside Pennsylvania.

There are exemptions to this law covering commercial nurserymen and growers. We quote the following from the Bureau of Sales and Use Tax:

TR-226—Personality Used or Consumed Directly in Farming, Dairying, Agriculture, Horticulture or Floriculture.

(1) "Farming." For the purpose of this regulation the term "Farming" shall include Dairying, Agriculture, Horticulture and Floriculture, each of which for the purpose of this regulation is defined as follows:

(2) "Horticulture" is the activity, engaged in as a business, of producing vegetables, vegetable plants, fruits, or nursery stock and includes the operation of commercial vegetable greenhouse or nursery.

(3) "Floriculture" is the activity, engaged in as a business, of producing flowers, plants or trees, either in a field, nursery or greenhouse.

If you are a commercial nurseryman or grower, you must file an EXEMPTION CERTIFICATE with us to be exempt from tax payment. We are required by law to retain this certificate in our files at all times. (A-Sec. 546 (c)).

If you do not have a copy of this exemption certificate, we shall be happy to forward same upon request.

SCOTCH PINE DATA FOR CHRISTMAS TREE GROWERS

WHAT ARE THE BEST STRAINS: No one seems to have the answer to this important question. While one particular strain may do well in a certain region, it may not fare as well in another. State Forestry departments, Christmas tree growers and others are trying to follow the present sources in the field. It is hoped that within a matter of 5 to 10 years some definite information will be available.

WHAT STRAINS SHOW THE BEST COLOR: Strains from the Baltic countries which include Norway, Sweden, Finland and parts of Poland, etc. are the extreme types, both as to slower rate of growth and yellowing during the winter in this climate. Strains from the extreme Southern types including parts of France, Germany, Yugoslavia, Austria, Italy and Spain are faster growing and retain a more green or bluish-green color.

WHAT STRAINS SHOW THE BEST FORM: While the strains from the Baltic countries tend to grow the tallest and retain the best form, they are also the poorest for winter color. Scotch pine in its native range grows from the extreme Northern part of Europe down to the tip of Southern Italy. Generally in the Southern advance, form becomes poorer as the color quality increases.

GENERAL CONCLUSIONS: Since winter colors are the deciding factor to good Christmas trees, the following observations have been the general rule on most cold weather inspections on American plantations:

1. Decidedly blue-green: Belgium, Holland, Spain and Scotland
2. Bluish-green: Baltic States, coastal Germany and Holland
3. Light blue-green: South Poland, Hungary, Germany, Central Europe, Northern Italy and Roumania
4. Dark green: Italy, Southern Germany, Austria and Yugoslavia
5. Dull yellowish-green: Central Sweden, Poland and extreme Northern Germany
6. Yellow-green: North Finland, Sweden and Norway
